

SHARP News Bibliographies

(created July 2026)

SHARP News strives to publish between three and four bibliographies a year. We publish mainly three types of bibliographies: an annual bibliography, a bibliography of theses and dissertations, and thematic bibliographies.

Annual bibliography

What we strive to include:

- monographs and edited collections
- books in all languages, temporal and geographic scopes and places of publication
- a wide definition of book history
- works published in the previous year to the bibliography.

What we do not include:

- reprints (books will only be included in one year)
- exhibition catalogues, unless they have substantial scholarship
- pure source material (correspondence, critical editions)
- journal articles, book reviews and special editions of journals
- fiction.

At this moment, we do not have the capacity to expand these parameters to include journal articles or book reviews.

Please [click the link to suggest a book published in 2026](#) for our next bibliography, which will be published in 2027.

Found something we missed?

The bibliographies are prepared by a small team of volunteers, and we are certain we don't find every book published in book history. We do ask you before getting in touch to kindly double check if the item you want to submit matches our exclusion criteria. If you want to point out a monograph or edited collection we missed, [please use this form](#).

Theses and dissertations

We include dissertation and theses of all levels (undergraduate, Masters and doctoral) dealing with book history from the previous year.

Please [click the link to suggest a dissertation or thesis from 2024–2025 for our next bibliography](#). And please use this one if you want to [submit a work published after 2010 that we missed](#).

Special topics bibliographies

SHARP News publishes bibliographies on special topics. Please [click the link if you would like to suggest future topics and collaborations](#). We are unfortunately unable to respond to most queries since we already have many suggestions listed, but we always appreciate the feedback from SHARP members and we certainly take it into consideration to determine which topics should be prioritized.
